

Customizing Comfort

Through Design and Innovation

NYOrtho Sheepskin Products help make everything cozy and comfortable with soft, plush, synthetic sheepskin materials. Used in many products, synthetic sheepskin is soft to the touch and feels wonderful against the skin.

- High-pile fur promotes air circulation beneath the resident and provides comfortable cushioning.
- Low shear, non-allergenic synthetic sheepskin reduces risk of pressure sores.
- Provides a comfortable base preventing skin from sticking to wheelchair vinyl seats and backs.
- Machine washable and meets CA 117 Standards.
- Berry Compliant Fabric.
